

Key Knowledge

Designing a Theatre

We will be looking at the architecture of theatres and how theatres have changed over time. One theatre we will be learning about is The Globe (pictured above), for which Shakespeare wrote his plays.

We will be learning about some designers from the past and present. Such as Polykleitos, who was an Ancient Greek sculptor, and Cuthbert Burbage, who designed and built the original Globe theatre which opened in 1599.

We will be designing our own theatres, with a particular focus on the features a theatre will need, such as a stage. We will also be creating 3D prototypes of our theatres, thinking about structure and then using lolly sticks and card to create levers, linkages and pop-up features.

Cooking and Nutrition

During Shakespearean times, pies were a popular choice of interval snack at the theatre. We will be creating our own pie recipes, including writing up the ingredients and method. We will then follow our recipes to make our own pies.

We will be sampling the pies and providing feedback about what we liked about the pies and how they could be improved. We will also be investigating what everyone's favourite filling is and will represent this information through a pie chart.

Key Vocabulary

Architect

A person who designs buildings

Designer

A person who plans the looks or workings of something before it is made, by preparing drawings or plans

Product

Something that is designed and made

Materials

A substance or mixture of substances that is used to make an object

Structure

Something of many parts that is put together

Prototype

An early model of a product built to test a concept or process

Chef

A trained professional cook who is proficient in all aspects of food preparation

Recipe

A set of instructions for preparing a particular dish, including a list of ingredients required

Ingredients

The foods that are combined to make a particular dish

Hygiene

The practice of keeping clean to stay healthy and prevent disease
